

# Laboratory Exercise 4

Due to me by (or before) 5:00pm, Monday, October 22nd

The Written Exercises (problems) are to be done individually.

## Problems

1. C Quiz corrections: Take your C Quiz and use your lab time to research and solve all the problems correctly.

Produce complete solutions (rather than “I should have added one.”, for example).

If you received full credit on a problem, simply write “full credit.”

## Laboratory Exercises

There are no laboratory exercises this week. Stay tuned for next week.

## What to turn in

Submit your corrections along with the exam to me in class (physically, on a dead tree).
